is fine.

Spectacles instructions - read all instructions before beginning.

Cut out all parts, leave the area above the stamp uncut if you want to have a torn edge there. Use a bonefolder to crease along the edge of the tab. Fold tabs away from the temple. (the stem of the spectacles) Use glue stick to attach white tab on temple to spectacles. Lay your spectacles on a cutting mat with ruled lines. Line up temple to run parallel to a line running horizontally through the spectacles. Repeat with other temple. Position the tab of the temple about 1/4 inch from the edge of the spectacle, checking from the front to make sure no white tab shows.
