

**Instructions for slip case:**

The pattern shows the inside of the case.

Cut out, score lines with bone folder, fold along lines, folding tabs to the inside.

Cut away 3 areas with x's.

Note: The tabs can be on the inside of the case, or on the outside.

If they are on the outside it's easier to slip the paper spectacles in, but they show.

If tabs are on inside, you may have to turn the case over and try slipping in the spectacles in from another angle.

Fold up case, apply glue stick to the tabs.

Cut a second crescent shape to match the first.
